Pipeline or Power Line		Golf Course	
Ridge or Fence		National Park or Forest	
Property Line or Nonvisible Boundary		Other Park	
Perennial Stream		Outside Subject Area	
Intermittent Stream			
Mountain Peak or Hill		Inset Area	

Where state, county, and/or MCD/CCD boundaries coincide, the map shows the boundary symbol for only the highest-ranking of these boundaries. Where American Indian reservation and American Indian tribal subdivision boundaries coincide, the map shows only the American Indian reservation boundaries.

Entity names are followed by either their FIPS code or census code; parentheses indicate a census code.

- 1 MCD¹ indicates a false MCD. These are for Census Bureau use only.
- 2 The CCID and CDP boundaries represent statistical entities only and are not updated through the BAS.
- 3 Incorporated place name color corresponds to the incorporated place fill color.
- 4 Geographic offsets and corridors are displayed directly on the road. Geographic offsets and corridors represent the road right-of-way for both or one side of a road and typically extend thirty feet from the road.

Due to space limitations, some road names, along with other feature and geography names on the map, may not be shown.

The Census Bureau stores primary and alternate road names, but only primary road names are used to label the roads on these maps.

Sheet Location within City

The diagram illustrates the relationship between a Key to Adjacent Sheets and a Sheet Location within a City. The Key to Adjacent Sheets is a 3x3 grid where the center cell (row 2, column 2) is highlighted in yellow and labeled '8'. The Sheet Location within a City is a large yellow irregular shape representing a city, with a small white rectangle labeled '8' indicating the location of the specific sheet within the city.
